

# PROBLEM

Have you ever wanted to know what time it is?

Have you ever wanted to be “Alarmed” to a specific time?

# CLOCK

Never be late again.

**WHAT  
CAN  
CLOCK  
DO?**

SET & DISPLAY THE CURRENT TIME

WHAT  
CAN  
CLOCK  
DO?

# WHAT CAN CLOCK DO?

12HR AND 24HR FORMAT

# WHAT CAN CLOCK DO?

## Components List

## ATtiny 4313A

The ATtiny4313A is a microcontroller from the AVR family manufactured by Microchip Technology (formerly Atmel). It's part of the Atmel AVR 8-bit RISC-based microcontroller series, known for its low power consumption, simplicity, and versatility. A microcontroller is basically a computer on a single IC (integrated circuit).

**Components  
List**

## Components List

## Other Components

### Project Kit

- 16x2 LCD
- Crystal
- Voltage Regulator
- 8 Pin Push Buttons
- 2 0.33uf capacitors
- 1 Diode
- Speaker
- Transistor
- Switch
- Microchip Holder
- 1 10K resistor
- 1 330 Resistor
- Knobb Shifter
- Connectro clips
- PCB Bed
- Diode

### Other Equipment

- Breadboard- \$2500
- Twin and Earth wire- 1000
- Transformer-\$2000
- Poloulu AVR Programmer-\$1200
- Plug (3 Prong)-\$500

= \$6000 JMD

TIMES UP!!!
